About College

Indraraj Arts, Commerce, Science College, Sillod was established in 1998. Right from the establishment our college is committed to the cause of sculpturing the young generation which are the future and real architect of our country. The college seeks to achieve the highest levels of distinction in the dissemination of the knowledge and understanding by providing students conventional as well as nonconventional courses to meet the dire needs of the land through a sound all-rounded academic development and excellence. The commitment and devotion of all the stakeholders of our college, promising performance of the faculties with visionary guidance of management of the college enable our students to accept challenges in life with better performance. All our curricular, co-curricular and extracurricular activities are student oriented. We always try to provide a critical insights to our students with which they may find the routs to reach the desired destinations in life.

About The Aakash Agri Solutions Private Limited

Aakash Agri Solutions Pvt. Ltd. Is a Global Agriculture Innovation & Research center established in 2015 which has dedicated it in imparting skilled training among other things to the farming community under the Agriculture and Allied sectors. Aakash Agri Solutions Pvt. Ltd is in the field of Agriculture since 1980s catering to the needs of the farming community in input supplies, credit, warehousing services and knowledge sharing. In the skilling space, the journey of imparting skills sets to the farming community started way back in 1992 that comprised knowledge dissemination on entire crop cycle including pre sowing, pest and disease control measures, irrigation & fertilization management, harvesting and post harvesting solutions.

We strongly believe that by building an institutional frame work for a more structured approach to the knowledge and training needs of the farming community is a sin-quo-non for the overall growth and development of the country.

Keeping that in mind, we at Aakash Agri Solutions have already commenced our journey in creating institutional mechanisms, infrastructure logistics requirements based on the learning experiences acquired from the countries like, Israel and The Netherlands.

At the beginning of the one day training Programm , Dr. Rajeev Patil, Chief Officer, Akash Agri Solutions Pvt Ltd. Sillod. gave his Lecture to participants and he introduce about the Company ,which work is going on in the company .He told company will be Provide services in agriculture such as agro consultancy, private warehousing, pledge finance on agro products, seedling nurseries, agro trainings etc. Company is agreed to, after completion of students degree from the college, company will guide to participants for the preparation of project file and submit to the nationalized bank, up to how to start business. Dr. Rajeev sir, specially gave more information to participants students about how to start our small scale business at local level by using agriculture product.

Mr Rahul Rajput Aakash agri private limited agriculture coordinator officer Maharashtra was also very source person during this training program he said in future student mustard their small scale business industry nowadays students should not depends on only his traditional BA BSc and BCom degrees in addition to degree student must acquire some skill then he will understand in business in addition to that local peoples and student should enter in the value added product based on maze and chillies our taluka is famous for the cultivation of these both the crops villages and students of this area company based on local crop production with the help of Aakash agree solution private limited and this company will help all kinds which is necessary for to start the business

Skill Development is the process of identification of the skills gap in youth and providing skilling training & employment benefits to them is our target. In this lecture Dr. J.S. Ambhore gave his lecture on” Carrier opportunities in Botany”

A career in Botany might just be one of the most preferred careers in India. Botany as a subject is related to the study of plants and a career in it would mean studying in depth about *fungi, algae, plants, diseases, growth, metabolism and the structure* between different groups. When planning a career in Botany, the job profile can include study of plants, research, working with industries, teaching, self-employment, and being a part of many more fields.

A person who works in this field is called a botanist. It will be the job of the botanist to study plant life along with finding solutions to problems related to that of forest and agriculture. There

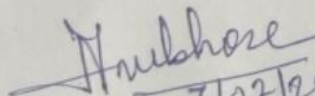

are also botanists who deal with space travel agriculture, artificial environments, hydroponics and various other interesting areas of research.

Botanists are required by varied organizations ranging from multinationals to research organisations to hospitality and tourism bodies, depending upon the nature of their activities. They fit into different roles depending on the activity of the organization and evolve into senior positions at high salaries..

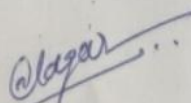

Dr Biradar Rupali explain about the career opportunities for botany students in the field of agriculture .she inspired the students by giving the examples of successful business leaders in the agriculture sector as well as giving examples of the successful farmers who used the advance technology in their field. Focus of the lecture was student motivation and to create there interest in entrepreneurship in the field of agriculture. In the lecture economic importance of chilli (*Capsicum annum*) and maize (zea mays) were explain with their value added products. chillies are used in cooking pickle and chutney, due to its Universal use it is known as the queen of spices .Maize has various health benefits the B- complex vitamin is good for skin, hair, heart and brain also. Maize or corn is an important cereal crop of the world .It is a source of Nutrition as well as part of chemical compounds. Phytochemicals plays an important role in preventing chronic diseases. Maize is widely processed into various types of products such as corn meal, snacks breakfast cereals; starch flour is used to make chapatti and bread. It is major ingredient of cattle and poultry feed majors source of industrial starch Maize is also called as queen of cereal.

All resource persons gave very fruitful Information about career opportunities in agriculture, through this program all students get benefit about how to start agri based business, and career opportunities in Botany. Dr. Nagare K.R expressed vote of thanks of this program.

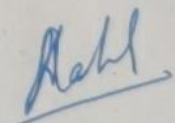

This full day program was over at 4.30 pm.
